

# TOTAL ALGAECIDE

Total Algaecide is a concentrated dual action formula which will eliminate stubborn algae. It is very effective against severe blue, green, black spot and mustard algae.

## GENERAL INSTRUCTIONS

1. Clean pool thoroughly, brush walls and floor with a stiff pool brush, vacuum to waste and backwash.
2. Adjust the pH to between 6.8 - 7.0.
3. Continue to run circulation and filtration as normal.
4. Superchlorinate the pool using a registered sanitiser.
5. Wait 24 hours and then pour the calculated volume of Total Algaecide near the algae (refer to the table below). **DO NOT ADD THE PRODUCT VIA THE POOL SKIMMER!**
6. After treatment wait 24 hours, adjust sanitiser levels accordingly and filter as normal.

**CAUTION:** When dosing the product excessive copper concentrations may discolour hair and swimwear as well as pool surfaces.

**Please note:** This product is NOT compatible with Baquacil polyhexamethylenebiguanide) or similar PHMB products. We recommend using Lo-Chlor Starver® or Starver® X after Superchlorination. This will assist with the removal of phosphate from your pool water, the removal of phosphate prior to adding Total Algaecide improves product efficiency.

**REMEMBER NO PHOSPHATES = NO ALGAE.**

## DOSE RATES

POOL VOLUME:		DOSE:
GALLONS:	LITRES:	
5,500	25,000	550ml
11,000	50,000	1100ml
16,500	75,000	1650ml

**N.B.** Copper in water reduces the activity of chlorine and bromine. Check chlorine or bromine levels 24 hours after applying this product and adjust according to the required levels.

Copper concentrations in the swimming pool water must not exceed 1mg/ltr. Check copper levels with a suitable copper test kit.

**Use algaecides safely. Always read the label and product information before use.**
